

# Readysert™ Metal Inserts

Slatwall panels machined to accept the Readysert™ inserts provide the option to work with the plain groove or with the added strength of the metal inserts.

## Metal Insert Comparison

- Plain grooves and metal insert grooves work together in this hybrid slatwall panel.
- The Readysert™ insert can be easily installed when and where it's needed.
- The standard slatwall accessories fit both the plain groove and the Readysert™ metal insert.

Check wire and non-standard slatwall accessories for fit.

- **Save Costs** - Use the inserts only where and when the extra strength is needed.
- **Convenience** - Slatwall works both as plain groove and with the metal.
- **Flexibility** - The Readysert™ can be added and moved whenever necessary\*.
