

DASHwall™ Series

Anchor™ Core is **50% stronger** than slatwall made with medium density fiberboard (MDF) core.

Wind Mill Slatwall Products is the **exclusive** manufacturer of Anchor™ Core retail display panels.

For an eye catching effect, DASHwall™ is produced with a variety of inline or staggered grooves. This practical series provides ample accessory configurations.

DASHwall™ is a stylish alternative when lighter displays are needed. DASHwall™ is available in various configuration to meet the needs of specific displays.

Consult our expert Project Managers for all custom projects.

CUBEwall™ Series

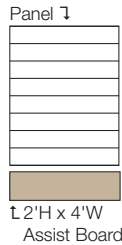

- Made with Anchor™ Core
- Customized finishes
- A variety of configurations

Panel Installation Instructions

1. Determine location where panels will be installed. Use a level to draw a straight line at desired height.
2. When installing over drywall use a stud finder to mark the center of each stud on the pre drawn level line.
3. Use correct length screws to attach panel to the wall, drilling through the grooves (see Illustration A below). Due to the uniqueness of each installation, **fastening screws are not included.**
4. If cutting is required, cut wall panels with a power saw. The saw blade should enter the finished side of the wall panels (back side of board is facing up).

TIP: For a single person installation, mount a level 2'H x 4'L assist board to rest the panel on.

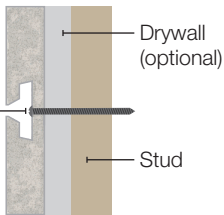

Special Note

1. DASHwall™ is intended for medium and light weight use. Do not overload DASHwall™ grooves with weight since there is less than 6" of material between grooves.
2. Clean with damp soft cloth limiting water and harsh chemicals.

Install standard drywall screws through the back of the grooves (**fastening screws are not included**)

Accessories

Accessories provide the ability to create personalized organization providing a simple way to arrange and rearrange products. Use shelves, baskets, and various hooks to meet your organizational needs.

Necessary Tools

- Safety goggles
- Tape measure
- Stud finder
- Level
- Standard drywall screws
- Drill (screw gun)

Safety First

Use all tools according to the manufacturer's recommendations.

Do's and Don't's

- DO distribute weight equally on the panels.
- DO use tools per manufacturer's recommendations.
- DON'T climb, hang, or step on accessories.
- DON'T overload accessories with additional weight.
- DON'T drop heavy items on accessories.
