

Anchor™ Core Easy Panels™ Installation Instructions

- Determine location where panels will be installed. Use a level to draw a straight line at desired height.
- When installing over drywall use a stud finder to mark the center of each stud on the pre drawn level line.
- Use correct length screws to attach panel to the wall, drilling through the grooves (see Illustration A below). Due to the uniqueness of each installation, **fastening screws are not included.**
- If cutting is required, cut wall panels with a power saw. The saw blade should enter the finished side of the wall panels (back side of board is facing up).

TIP: Mount panels approximately 48" from floor to bottom of panel.

TIP: For a single person installation, mount a level assist board to rest the panel on.

Optional Ready-Sert™ Installation Instructions

- Remove one end cap from tube. Count the number of Ready-Serts™ to make sure all 15 pieces are included. NOTE: One (1) Ready-Sert™ is used when two panels are VERTICALLY stacked (see Illustration B below).
- Inserts should be installed in panel prior to any installation.
- Use #6 pan head sheet metal screws when mounting the optional Ready-Sert™.
- Drill two 1/8" pilot holes through the Ready-Sert™, at two stud locations at opposite ends of the panel. Using a power drill, drive the #6 pan head screw through the Ready-Sert™ and into the stud, being careful not to catch the lip of the insert with the screw.
- Complete the installation by drilling pilot holes and driving screws into each pre located stud and into every other groove. In a VERTICAL installation (see Illustration B below), make sure screws go through the Ready-Sert™ that is between the panels.

TIP: Screws larger than #6 will not fit in a Ready-Sert™.

Accessories

Accessories provide the ability to create personalized organization providing a simple way to arrange and rearrange products. Use shelves, baskets, and various hooks to meet your organizational needs. Visit www.GarageEscape for details.

Necessary Tools

- Safety goggles
- Tape measure
- Stud finder
- Level
- #6 pan head sheet metal screws
- Drill (screw gun)

Safety First

Use all tools according to the manufacturer's recommendations.

Dos and Do Not

- DO distribute weight equally on the panels.
- DO use tools per manufacturer's recommendations.
- DO NOT climb, hang, or step on accessories.
- DO NOT overload accessories with additional weight.
- DO NOT drop heavy items on accessories.
