# Anchor™ Core Easy-Panel™ 2-Pack

Anchor™ Core Easy-Panels™ are easy to handle 24"H x 48"L panels with available accessories to help organize your garage to display tools, supplies, sports equipment, and children's toys. Easy-Panels™ can also organize home offices, art and craft areas, workrooms, laundry areas, closets, and any area requiring organization. Anchor™ Core Easy-Panels™ can be modified to function in any area where you need to "Make room for what you love".

Anchor™ Core Easy-Panels™ are made from Anchor™ Core. This engineered solution is 50% stronger than standard medium density fiberboard (MDF). Available finishes: Paint Ready, Cherry, Maple, and White. The two-pack is designed for ground shipment.

Accessories for Easy-Panel™ are available at [www.GarageEscape.com](http://www.GarageEscape.com)

## Ready-Sert™ Metal Inserts

Slatwall Easy-Panels™ are grooved panels that can easily include the optional Ready-Sert™ metal inserts. Ready-Sert™ Aluminum inserts will double the strength of the groove.

## Half Grooves

Half grooves provide the option of stacking panels, providing a seamless connection and usable groove.

## Anchor™ Core Easy Panel 2-Pack

- Anchor™ Core is 50% stronger than MDF
- Easy to install
- Seamless stacking
- Two 24"H x 48"L sections per pack
- Available finishes: Paint Ready, Cherry, Maple, and White

## Anchor™ Core Easy Panels™ Installation Instructions

1. Determine location where panels will be installed. Use a level to draw a straight line at desired height.
2. When installing over drywall use a stud finder to mark the center of each stud on the pre drawn level line.
3. Use correct length screws to attach panel to the wall, drilling through the grooves (see Illustration A below). Due to the uniqueness of each installation, **fastening screws are not included.**
4. If cutting is required, cut wall panels with a power saw. The saw blade should enter the finished side of the wall panels (back side of board is facing up).

**TIP:** Mount panels approximately 48" from floor to bottom of panel.

**TIP:** For a single person installation, mount a level assist board to rest the panel on.

Watch installation video

## Optional Ready-Sert™ Installation Instructions

1. Inserts should be installed in panel prior to any installation.
2. Use #6 pan head sheet metal screws when mounting the optional Ready-Sert™.
3. Drill two 1/8" pilot holes through the Ready-Sert™, at two stud locations at opposite ends of the panel. Using a power drill, drive the #6 pan head screw through the Ready-Sert™ and into the stud, being careful not to catch the lip of the insert with the screw.
4. Complete the installation by drilling pilot holes and driving screws into each pre located stud and into every other groove. In a VERTICAL installation (see Illustration B below), make sure screws go through the Ready-Sert™ that is between the panels.

**TIP:** Screws larger than #6 will not fit in a Ready-Sert™.

Note: Ready-Sert™ Aluminum inserts ship in tubes of 15 inserts per container. One insert will be left over if installing the panels in a horizontal installation (see illustration B below).

## Accessories

Accessories provide the ability to create personalized organization providing a simple way to arrange and rearrange products. Use shelves, baskets, and various hooks to meet your organizational needs. Visit [www.GarageEscape.com](http://www.GarageEscape.com) for details.

## Necessary Tools

- Safety glasses
- Tape measure
- Stud finder
- Level
- #6 pan head sheet metal screws
- Drill (screw gun)

## Safety First

Use all tools according to the manufacturer's recommendations.

## Dos and Dont's

- DO distribute weight equally on the panels.
- DO use tools per manufacturer's recommendations.
- DON'T climb, hang, or step on accessories.
- DON'T overload accessories with additional weight.
- DON'T drop heavy items on accessories.
