- Endless Wall Options - You Envision, We Create
- Vivid Ultra High Resolution & Color
- Environmentally Friendly Process
- No Minimum Quantities Required
- Solid Panels, DASHwall™, Custom Slatwall, Fixture/Gondola Inserts or Component Parts

Graphic Series HPL

Solid Panel

Graphic Series HPL delivers vivid ultra-high resolution and color. Printed directly to HPL (High Pressure Laminate) individual panels measure a standard size of 48" x 96" or smaller to your specification.

Display Panel Options

Display panels can be specified as Solid Panels, DASHwall™, Custom Slatwall, Fixture/Gondola Inserts or Component Parts. Manufactured with our exclusive Anchor™ Core, panels are 50% stronger than MDF.

DASHwall™

Solid Panels – Durable and attractive Graphic Series HPL panels are perfect for permanent installations. Use single or multiple panels for eye catching murals and focal walls.

DASHwall™ – As an alternative to slatwall, DASHwall™ is produced with a variety of staggered dashes on a solid surface panel. This treatment maximizes the graphics while retaining the functionality and accessories designed for slatwall. You decide the length and placement of the dashes with this option. Dashes groves can be painted to either accentuate or hide their appearance.

Custom Slatwall

Custom Slatwall – Wind Mill Slatwall Products specializes in custom slatwall panels. These proven retail display panels are unmatched for their flexibility. Optional Aluminum inserts add strength and beauty to the display panel. Inserts are available in standard mill, white and black colors or custom painted to your specification.

Fixture Inserts - Fixture/Gondola inserts can be manufactured to fit most fixtures. Wind Mill has drawings in house for many popular fixture manufactures.

Component Parts - Graphics can be incorporated into custom manufacture components. Wind Mill has extensive manufacturing capabilities.
