

## RTA H-UNIT ASSEMBLY INSTRUCTIONS

### TOOLS REQUIRED

#2 Phillips Screwdriver

Rubber Mallet

Cordless Drill (Optional)

### BASE KIT CONTENTS

1) Base Top

(21) Camlocks

(21) Camlock Pins

(24) Panhead Screws

(4) Dowels

(5) Kick Base Panels with  
Pre-drilled holes

(8) Confirmat  
Screws

(8) Screw Caps

(6) Casters

### ASSEMBLY

#### KICK BASE ASSEMBLY

1. Locate the yellow bag of hardware.
2. Set kick base with the underside facing up.
3. Using a screwdriver, install camlock pins into pre-drilled holes on the kick base panels. (See Figure 1)
4. Install camlocks by tapping them into position with a rubber mallet.

**NOTE:** Confirm the opening is facing out and camlock is fully seated into place.

5. Connect kick base panels with the base top upside down on a non-scratch surface (such as the cardboard packaging). The shortest, unfinished panel should be placed in the center. (See Figure 2)
6. Match the kicks with the same lengths parallel to each other and insert the screwdriver and turn right to lock.
7. Optional casters may be installed into the corners of pre-drilled holes using the pan-head screws.

**NOTE:** Tilt screwdriver slightly upwards while twisting to lock all camlocks.

#### CENTER AND WING PANEL INSTALLATION

8. Place the kick base right side up and set the (4) dowels into the pre-drilled holes on top of base.

**NOTE:** Strongly recommended for two people to hold and attach wings.

9. Place one wing panel onto the dowels. (See Figure 3)
10. Place one center panel onto the kick base and attach to wing panel by drilling confirmat screws into pre-drilled holes.
11. The second tier of the center panel sits on top of the bottom panel and secures the same as step 4. (See Figure 4)

#### SCREW CAP INSTALLATION

12. To cover the screw heads, remove the sticky back from the decorative screw caps and carefully align.

**NOTE:** A black magic marker can be used to touch up any dings, or nicks to the black base kicks. Clean with soft rags and water.
