

Designer Series - Shiplap Panels

The classic look of reclaimed wood with easy-to-install shiplap wall panels. Achieve stunning results in a short amount of time, without labor intensive individual wood strips! Cover an accent wall—or an entire room—to give your retail space a rustic, historical touch.

Shiplap panels can add instant transformation, texture and a focal point to any space. The panels are affordable and easy to install in any space not requiring functional displays.

Installation

Installation of shiplap panels horizontally can help carry the eye around the space, making it feel larger. Simply pin-nail through the panel directly into wall studs. You can also use construction adhesive if installing over other surfaces in good condition—just finish-nail in place to hold the panel while the adhesive dries.
